

CD-R / DVD-R Thermal Printing Template - 17mm hub

This template shows the printable area for your information only, to assist you in placing your text and logos where it will not be cropped. When creating artwork for disc printing it is sometimes easier to create a 120mm by 120mm square allowing the image to cover the entire disc. Do not remove the centre circle.

When you save your artwork, please ensure the following:

- › It is an RGB file
- › No trim marks or key lines appear
- › It is a minimum of 300dpi
- › And you have converted fonts to paths

If you would prefer, you are welcome to send us artwork files in Photoshop, Quark or Illustrator, however there may be additional artwork charges for the adjustments required to fit the relevant template or to match specific colours.

If you would like to discuss these requirements further, please give our sales team a call on 01256 681100.

If you are unsure of the hub size of your disk or have any problems in setting up your screens, please contact us.

Due to the ever improving nature of the equipment and software used in these processes, Magellan Hardware Ltd. reserve the right to amend these artwork specifications without notice. Please call our sales team for the most up-to-date information on CD/DVD printing.
